

UV-Screen Printing Ink Series 566

Series 566 is an universal UV-curing screen printing ink developed for screen printers who would like to print a whole variety of substrates by using just one ink system. The brilliant and highly glossy ink system Series 566 easyCURE MP obtains a broad spectrum of adhesion and resistances and is convincing competitive at the same time.

Application areas of graphic screen printing can be found everywhere in the daily life – in supermarkets, petrol stations, car retailers. The highly glossy colors on posters, advertising signs and displays are shining from a distance. The diverse application fields require an universal ink system.

Our UV-curing semi-glossy ink system Series 560 was successfully introduced to the market a few years ago. Since then the need for a glossy ink system with a similar spectrum of adhesion and resistances on different substrates was getting bigger and bigger. Our newly developed Series 566 easyCURE MP has it all and is lightfast and flexible as well – an All-round talent for demanding indoor and outdoor applications.

Our approved easyMix-Color matching system contains 11 mono pigmented EM-Base colors and one transparent varnish. Reproduction of classical color references as Pantone®, RAL or also any other color matching of special color references can be performed easily with this system.

The adhesion on a broad variety of substrates like PVC (film and rigid), Polystyrene, PET-G and PET-GAG, PMMA, pre-treated PP, corrugated PP-plates (f. e. Priplak®), Paper and Board offers universal application fields for our easyCURE MP.

Series 566 is designated for the printing of tags, posters, stickers, loose-leaf binders, displays and signs of all kind. Series 566 easyCURE MP is, due to the high flexibility of the system, perfectly suitable for processings as cutting and stamping etc..

Currently available are all the easyMIX-Base colors and varnish. Shortly Printcolor will also offer highly light fast and semi-glossy process inks with 3-5 years of outdoor resistance. They will follow the ISO-Standard as usual.
